EBRU DEDE

Graduated with the first honours degree from the Marmara University's Department of Painting in 2008. She studied at Accademia di Belle Arti L'Aquila Italy through Erasmus in 2007. She received her master's degree in Museum Management from Istanbul University in 2012. She completed her PhD thesis in 2018, in Yildiz Technical University in Art and Design Program. Her works of art are within the scope of figurative art. Her research interests are subject, identity and posthumanism.

She has been teaching at Maltepe University's Visual Communication Department since 2019 after giving lectures about graphic design, photography and animation in Kadir Has University for 10 years.

Solo Digital EXHIBITION 15-30 April 2023

SUBCONSCIOUS

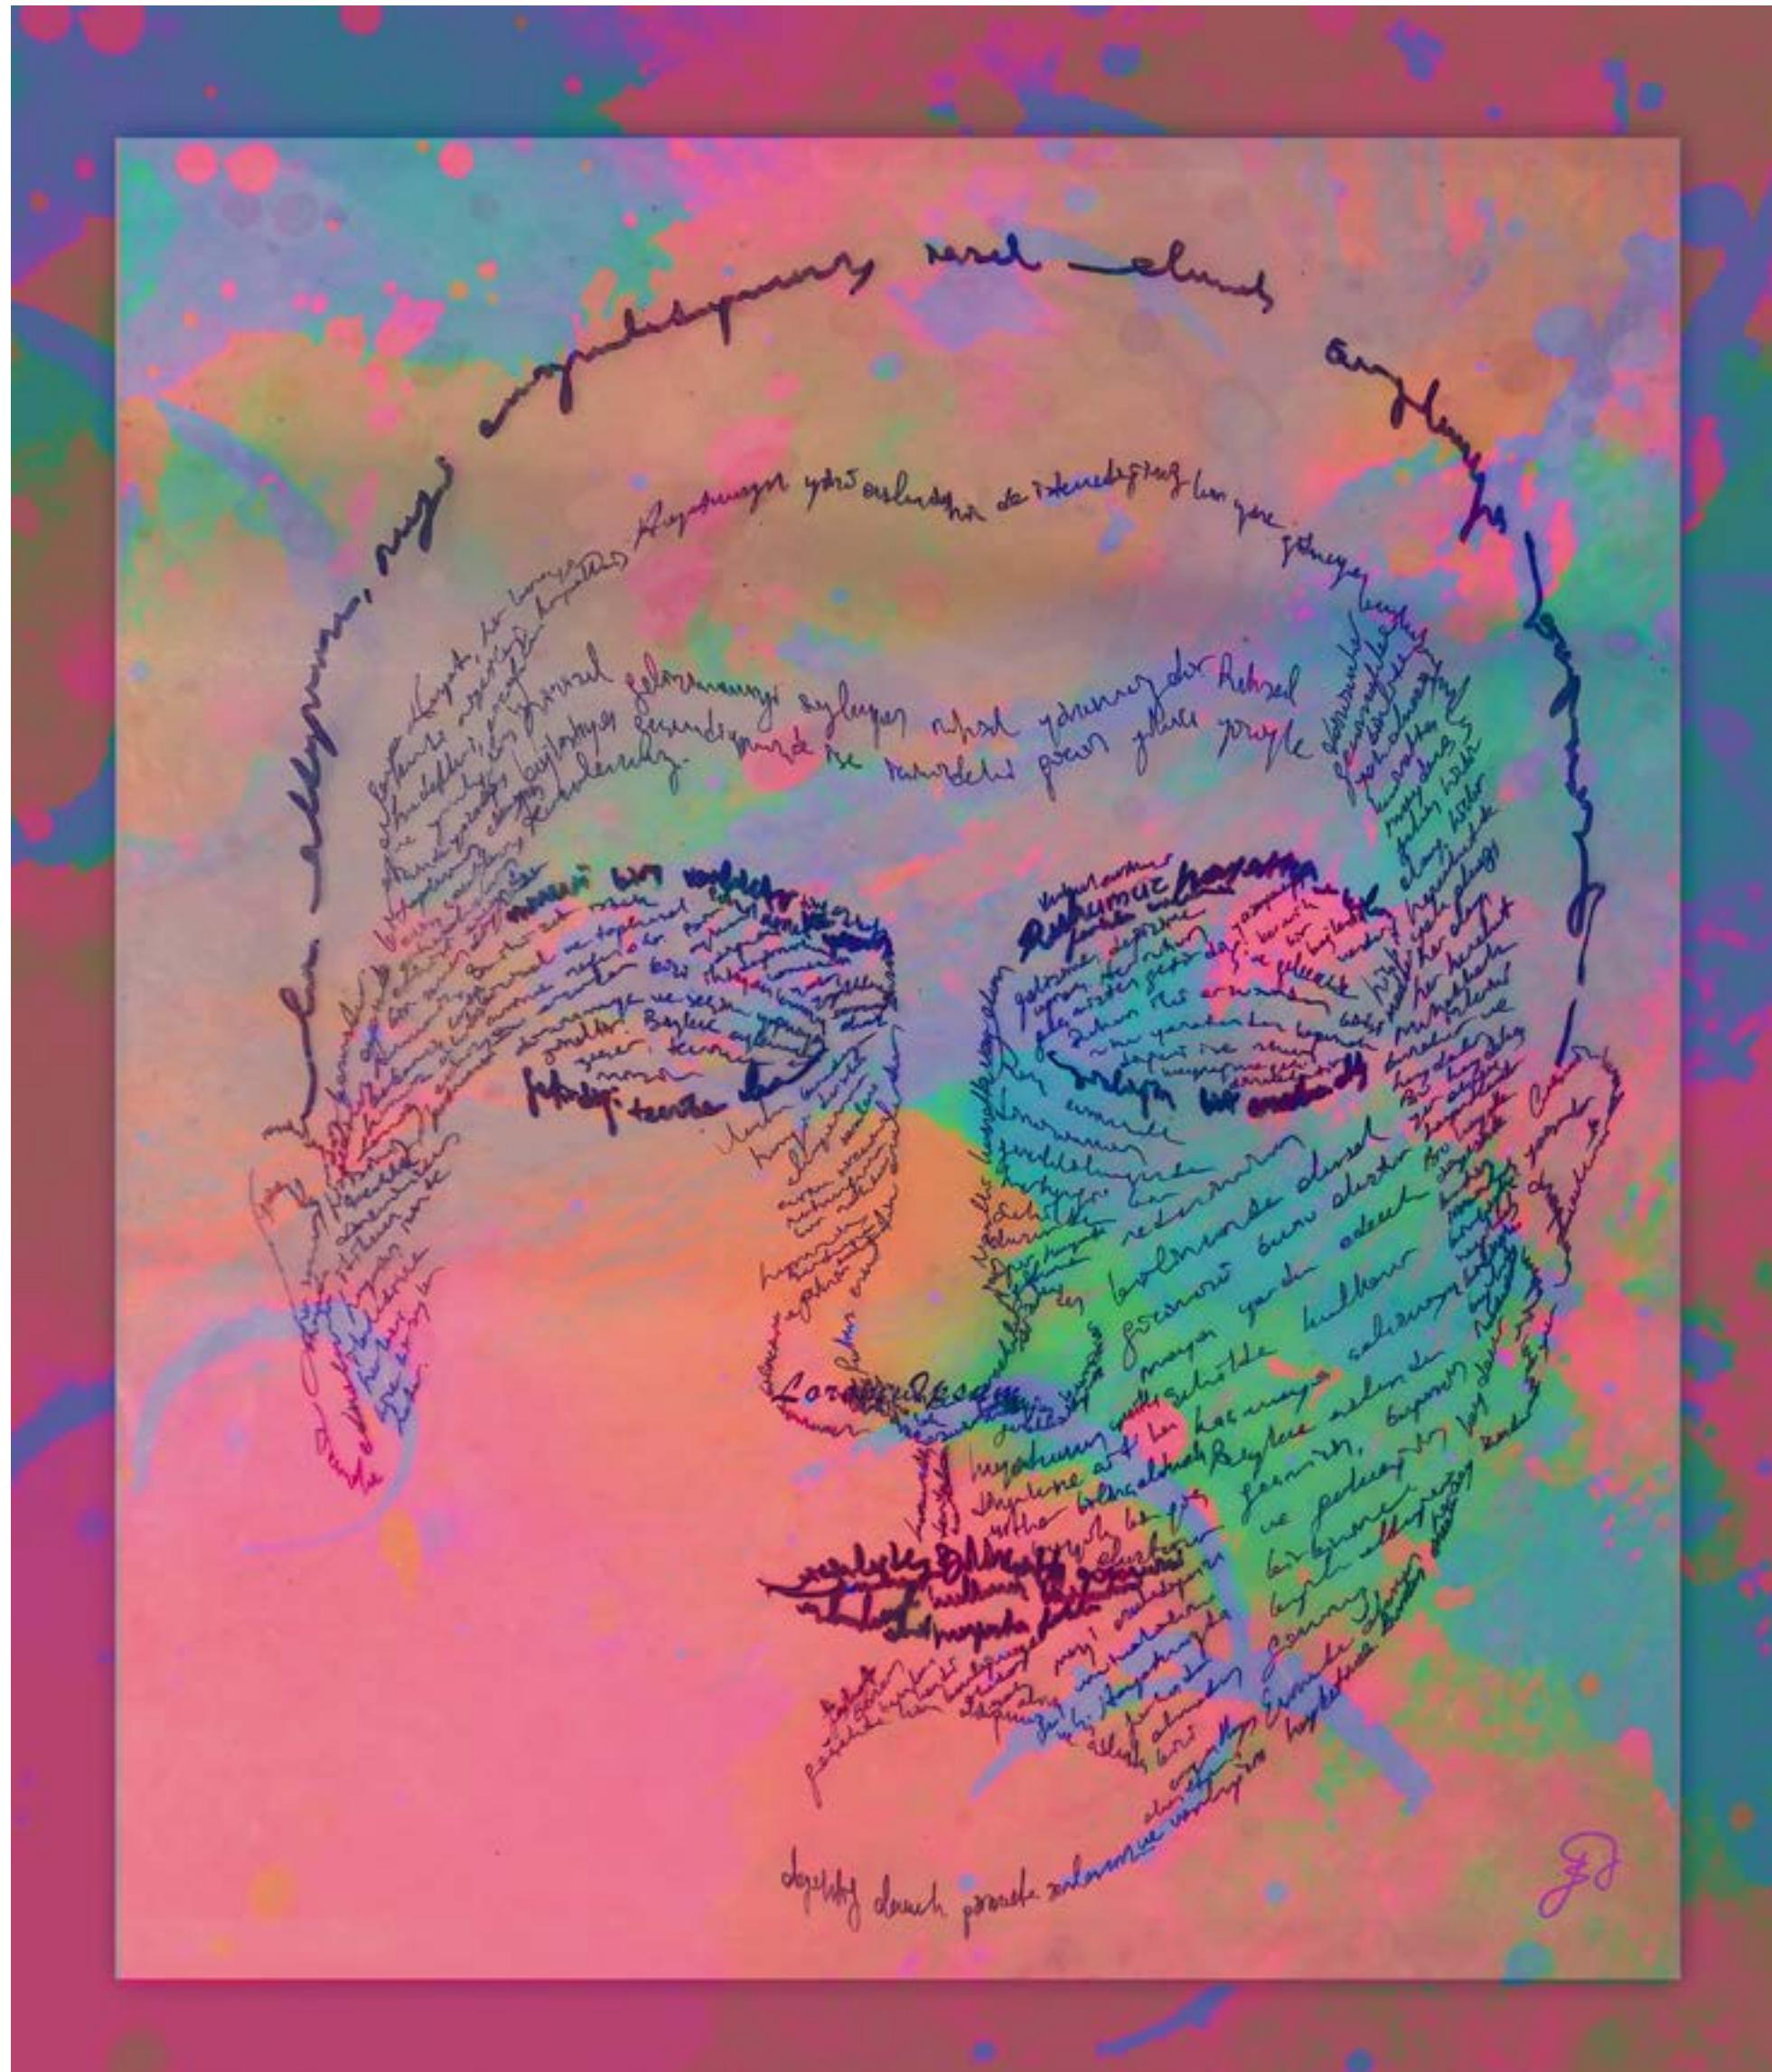

It is difficult to close your eyes to the outside world and read inside. Despite the difficulties, it is always a great happiness to discover new things in your inner world. Because the subconscious always continues to be filled with new things waiting to be discovered. The artist is a person who can build a bridge between the conscious and the subconscious. The depth of the artist's subconscious is like space. Having a wide imagination, the artist can distinguish between the real and the imaginary world. Just as the universe embraces all the stars, the artist tries to measure and integrate all aspects of events. In this effort, the artist is aware of how she/he gets weird from time to time. The artist has an objective view of the world and the self. Being aware of the negativities of daily life, instead of being carried away by them the artist tries to reflect them by producing works.

The artist is also aware of the self and her/his reflection. Seeing too much, thinking from different angles, a wide imagination and problem solving exhaust her/his mind so much that the artist needs to use art as an healing power.

The artist's subconscious has always been a matter of curiosity. If you analyse to the artist's subconscious, you will see that the layers are in harmony with each other. Although the artist has reactions to the outside world, she/he has peace and tranquility in her/his subconscious.

In the exhibition consisting of 25 digital works, the artist wanted to express the expression of her own subconscious. Each digital work has been created by blending works produced with different techniques such as watercolor, photography, drawing, which are the accumulation of years, in the photoshop program. Each of these works is an expressive description of the changes in the artist's inner world. Due to the nature of the subconscious mind, it does not contain a certain limit of expression.
